

Finition

Three views of a circular metal component. The top view shows a circular face with a central vertical slot. The side view shows the component's profile, which is a shallow cup or bowl shape. The bottom view shows the underside of the component, which is a flat circular surface with a central circular feature.

A close-up photograph of a metal plate, likely part of a door or window frame. The plate is silver-colored and features several fasteners: two large green padlocks, two smaller green padlocks, and two small silver screws. A silver hinge is visible on the right side of the plate. The plate is mounted on a dark surface.

Three views of a circular metal part. The top view shows a central rectangular slot. The side view shows a flange with a central raised area. The bottom view shows a dark, circular center.
